Checkpoint 12

</> 5 Practice programs | 94 Assignments

</> User Service 1 – Test Using Postman

2/2 XP | 45 Mins

</> User Service 2 – Test Using Postman

2/2 XP | 45 Mins

</> User Service 3 – Test Using Postman

2/2 XP | 45 Mins

</> Cinema Hall Service 1 – Test Using Postman

2/2 XP | 45 Mins

</> Find Winner SOAP Webservice – Test Using Postman

2/2 XP | 45 Mins

Verify the Success Status code 200 & 404 for the Bitcoin rate against USD and Non-USD currencies.

1/1 XP

Print Bitcoin rate against USD, GBP & EuR currency

1/1 XP

Download Postman

1/1 XP

Create workspace for API Request

1/1 XP

Create the Collections for API Request

1/1 XP

Sending the first API Request

1/1 XP

↑

	Get the response of GET API Request	1/1 XP
	Get the response of POST API Request	1/1 XP
	Get the response of PUT API Request	1/1 XP
	Get the response of PATCH and DELETE API Request	1/1 XP
	Create an environment in Postman	1/1 XP
	Set the environment variables in Postman	1/1 XP
	Get the values of the environment variables in Postman	1/1 XP
	Get the ID of the given API in Postman	1/1 XP
	Data Parameterization using CSV in Postman	1/1 XP
	Test API Using Swagger UI	1/1 XP
	Verify the response of the GET API	1/1 XP
	Validate the 200 status code in Rest Assured	1/1 XP
	Validate the 301 status code in Rest Assured	1/1 XP
	Validate the 404 status code in Rest Assured	1/1 XP
	Validate the 500 status code in Rest Assured	1/1 XP
	Get the API response in JSON in Rest Assured	1/1 XP
	Get the API response in XML in Rest Assured	1/1 XP
	Get the API response with single query parameter in Rest Assured	1/1 XP
	Get the API response with double query parameter in Rest Assured	1/1 XP
	Get the API response with path parameter in Rest Assured	1/1 XP
	Get the API response with base URI in Rest Assured	1/1 XP

	Create workspace for API Request	1/1 XP
	Create the Collections for API Request	1/1 XP
	Sending the first API Request	1/1 XP
	Get the response of GET API Request	1/1 XP
	Get the response of POST API Request	1/1 XP
	Get the response of GET API Request	1/1 XP
	Get the response of GET API Request	1/1 XP
	Get the response of PUT API Request	1/1 XP
	Get the response of PATCH API Request	1/1 XP
	Get the response of DELETE API Request	1/1 XP
	Create an environment in Postman	0/1 XP
	Set the environment variables in Postman	1/1 XP
	Get the values of the environment variables in Postman	1/1 XP
	Get the ID of the given API in Postman	1/1 XP
	Data Parameterization using CSV in Postman	1/1 XP
	Verify the Success Status code 200 for Add product details request	1/1 XP
	Print the success response for Add product details request	1/1 XP
	Update price of existing product details and verify the success status code 200	1/1 XP
	Update price of existing product details and print the updated price from response	1/1 XP
	Update only name of the existing product and verify the success code 200 displayed	1/1 XP
	Delete the product which is not available in the server and verify the status code 404 and 200	1/1 XP
	Verify the response status code with status code method in Rest Assured	1/1 XP

	Verify the response status code with assert That in Rest Assured	1/1 XP
	Verify the response status code with assertion with status Line method in Rest Assured	1/1 XP
	Verify the response status code with assertion with Hamcrest matchers method in Rest Assured	1/1 XP
		
	Handle the response using Getting a single header in Rest Assured	1/1 XP
	Handle the response using Getting all headers in Rest Assured	0/1 XP
		
	Validating a header in Rest Assured	0/1 XP
	Validating multiple headers in Rest Assured	0/1 XP
	Validating JSON schema using matchesJsonSchemaIn Classpath in Rest Assured	0/1 XP
		
	Field-by-Field Validation in Rest Assured	0/1 XP
	Structural Validation in Rest Assured	0/1 XP
	Validate the inline schema in rest assured	0/1 XP
	Validating response using Equality Check in Rest Assured	0/1 XP
	Validating response using List Size Check in Rest Assured	0/1 XP
	Validating response using Existence Check in Rest Assured	0/1 XP
	Validating response using Multiple Assertions in Rest Assured	0/1 XP
	Validating response using Logical Operations in Rest Assured	0/1 XP
	Validating response using Custom Parsers in Rest Assured	0/1 XP
	Validating response for a List of Values in Rest Assured	0/1 XP
	Validate cookies in Rest Assured	0/1 XP
	Get the response of an API using single header in Rest Assured	0/1 XP
	Get the response of an API using multiple headers in Rest Assured	0/1 XP

	Get the response of an API by setting headers from a map in Rest Assured	0/1 XP
	Utilize the redirect false command in Rest Assured	0/1 XP
	Limit the number of redirects in Rest Assured	0/1 XP
	Follow redirects but not use relaxed HTTPS validation on the redirected requests in Rest Assured	0/1 XP
	Ensure JSON schema data types are matching for the jsonplaceholder API request.	1/1 XP
	Ensure JSON schema data types are not matched for the jsonplaceholder API request.	1/1 XP
	Print number of universities in United States	1/1 XP
	Verify the success status code and response body from a API using Basic Authentication in Postman	1/1 XP
	Verify the success status code and response body from an API using Basic Authentication in RestAssured	1/1 XP
	Verify the failure status code and response body from an API using Basic Authentication in Postman	1/1 XP
	Get number of universities in United States and print the response log	0/1 XP
	Get number of universities in India and print response log by using ResponseLoggingFilter class	1/1 XP
	Get the number of universities in Canada and write response log into text file	0/1 XP
	Print United States population details for the year 2022.Use Request Specification for Base URI,drilldowns & measures	1/1 XP
	Print United States population details for the year 2020.Overwrite Request Specification for Base URI, drilldowns & measures	0/1 XP
	Print queried Request Specification by using Query() method	1/1 XP
	Print United States population details for the year 2022.Use Response Specification for status code & Content type as JSON	1/1 XP
	Print United States population details for the year 2020.Overwrite Response Specification for Status code & ContentType	1/1 XP
	Print United States population details for the year 2019. Use ResponseSpecBuilder for Status code & ContentType	1/1 XP

	Create a serilization POJO class in Rest Assured framework	1/1 XP
	Create a serilization class in Rest Assured framework	1/1 XP
	Create a de-serilization POJO class in Rest Assured framework	1/1 XP
	Directly hardcode the json body data in the string variable, use it for post request and verify the success status code 200	1/1 XP
	Create a separate class file, create a static string variable,store the json data,use it for post request and verify the success status code 200	1/1 XP
	Send A JSON file as payload to the request and verify the success status code 200	1/1 XP
	Checkpoint 13	
	10 Assignments	
	Verify the success response of the upload API from postman	1/1 XP
	Verify the failure response of the upload API from postman	1/1 XP
	Verify the success response of the upload API using multipart from rest assured	0/1 XP
	Verify the create user API and extract the ID value from Create API in Postman	1/1 XP
	Verify if the response values from the API is getting stored in environment variables in postman	0/1 XP
	Verify the create user API in RestAssured using faker	0/1 XP
	Create a cucumber BDD Framework which should support API automation.	0/2 XP
	Working with GitHub and Git	0/1 XP
	Integration of Rest assured API test script(Maven/TestNG) Based framework with jenkins Freestyle project	0/1 XP
	Execute different methods parallellly using TestNG in Rest Assured	0/1 XP
